WORK EXPERIENCE

Halliburton

December 2021 – Present

Front-end Developer

Halliburton provides products and services for the ever-evolving needs of the energy industry.

- Build and integrate a library into the system for any type of petroleum engineering work.
- Example: EDrilling DHT library - create a simulation of the oil drilling trajectory by running eDrilling's time-based and depth-based dynamic simulations for hydraulics and temperature.
- Maintain, fix bug, upgrade the current library, etc.

Tech stack: Angular, TypeScript, PrimeNg, Odata, Rxjs, etc.

Personal Project: Movie Tickets Online Booking

January 2021 – August 2021

Front-end Developer

Build a movie seat booking app using React - JavaScript. Key features: finding movies, filtering theaters and dates, viewing movie details, simulating rows of seats, reviewing purchased tickets, management of user accounts and movies, adding new showtimes.

Tech stack: React, Redux, Material-UI.
